

Assignment 3: Angular, TypeScript, Bootstrap, Responsive Design, JavaScript in Server Side, Node.js, Express, AJAX, JSON, and Artsy API

Grading Guidelines

Graders will test the homework using the latest version of Google Chrome.

Total Points: 15

Grading Guidelines

Page Layout (0.75 points)

- Header Bar
 - Has a header bar that is visually similar to the reference (0.125 points)
 - Header bar contains the “Artist Search” text on the left (0.125 points)
 - Header contains the correct menu items and profile dropdown according to current auth state. (0.25 points)
- Footer Bar
 - Has a footer bar which contains the “Powered by Artsy” text with Artsy logo before Artsy and is visually similar to the reference (0.125 points)
 - When “Powered by Artsy” text is clicked, the Artsy homepage at <https://www.artsy.net> is opened. (0.125 points)

Search Form (1 point)

- Search form has a correct layout, styling and positioning. Placeholder text “Please enter an artist name.” is present in the input field. (0.125 points)
- Search button is disabled initially, is enabled when input is entered and is disabled again when input is removed. When the input field is clicked, the border changes correctly. (0.125 points)
- The clear button resets the page. (0.25 points)
- Search is functional when the search button is clicked and the enter button is hit. (0.25 points)
- When an artist is searched, the spinner is shown in the search button until a response arrives and is hidden afterwards. (0.125 points)
- When the response arrives, the result list is shown. (0.125 points)

Result List (2.25 points)

- Artsy logo is shown as an artist image if the artist does not have an image. (0.125 points)
- Result cards have correct styling (colors and spacing). (0.25 points)

- Result cards have correct positioning (margins). (0.125 points)
- Result list has correct styling and positioning (horizontally scrollable, cantered). (0.375 points)
- Artist names have correct styling. (0.125 points)
- Result card background color changes when hovered. (0.125 points)
- When a result card is clicked, spinner is shown in the correct place until a response arrives and is hidden afterwards. (0.375 points)
- When a result card is clicked, its background is set to darker blue and any other card's background color is set to original blue. (0.25 points)
- When the response arrives, artist details are shown. (0.25 points)
- When the search results are empty, error containing text "No results found." is shown. (0.25 points)

Artist Details Tabs (0.5 points)

- Artist Info and Artworks buttons have correct styling and positioning. (0.25 points)
- Artist Info and Artworks buttons are functional. (0.125 points)
- Active tab's button's background color is set correctly. (0.125 points)

Artist Details: Artist Info (1 points)

- Artist name is shown correctly. (0.125 points)
- Artist birth and death dates are shown correctly. (0.125 points)
- Artist nationality is shown correctly. (0.125 points)
- Artist biography is shown correctly. (0.125 points)
- Page refresh.(0.125 points)
- Similar artists is visible if authenticated.(0.125 points)
- Similar artist cards open artists and show correct info.(0.125 points)
- Toggling favorites is reactive and reflects everywhere (eg: click on search result star also turns star in artist detail>full name).(0.125 points)

Artist Details: Artworks (2.5 points)

- When an artist does not have any artworks, an error contains text "No artworks." is shown. (0.25 points)
- Artwork cards have correct styling. (0.25 points)
- Artwork cards have correct positioning. (0.25 points)
- Categories buttons open the modal for categories for the corresponding artworks. (0.25 points)
- Spinner is shown in the content section of the categories modal while the data is being fetched, and the spinner is hidden after the response arrives. (0.25 points)
- Categories modal title styling is correct (image, name, date) (0.25 points)
- Category cards have correct styling. (0.25 points)
- Category cards have correct positioning. (0.25 points)
- Categories modal has a close icon on top right, which closes the modal when clicked. (0.125 points)
- Categories modal closes when somewhere outside of it is clicked on the page. (0.125 points)
- If an artwork does not have a category, an error containing text "No categories." Is shown. (0.25 points)

Authentication (1.25 points)

- Registration basic validation & register button disabled state. (0.125 points)
- Registration validation – existing email. (0.125 points)
- Login basic validation & login button disabled state. (0.125 points)
- Login validation – incorrect credentials. (0.125 points)
- Auth state survives refresh. (0.25 points)
- Header dropdown actions (log out & delete profile) are functioning properly. (0.25 points)
- Notifications (login, logout). (0.25 points)

Favorites (1.75 points)

- Adding/removing triggers notifications. (0.25 points)
- Notifications can be closed manually. (0.125 points)
- List shows artists. (0.25 points)
- Empty list shows error message. (0.25 points)
- Artist card leads to artist detail page and shows correct content. (0.25 points)
- Order is “Newer-first”. (0.125 points)
- Relative time is updated every second. (0.125 points)
- Relative time has correct format and honours singular-plural forms. (0.125 points)
- The Favorites page has a spinner and loads correctly on page refresh (F5, Cmd+R). (0.125 points)
- Favorites are not shared between different users. (0.125 points)

Different Use Cases (2 points)

- When the user clicks on another search result while the details of another one are being shown:
 - Existing details are hidden (0.25 points)
 - Spinner is shown in the correct place until a response arrives and is hidden afterwards (0.125 points)
 - The background color of the newly selected card is set to darker blue, background color of all other cards are set to original blue (0.125 points)
 - The details of the newly selected artist are shown correctly (0.25 points)
- When the user searches for a new artist while the details of an artist are being shown:
 - Existing details are not hidden (0.125 points)
 - Existing result list is not hidden (0.125 points)
 - The background color of the currently selected artist will not be changed (0.125 points)
 - Spinner of the search button is shown in the correct place until a response arrives and is hidden afterwards (0.125 points)
 - The result list is replaced with the new results once the response arrives (0.25 points)
- When a user searches a new artist using the search bar while search results are being shown without any details:
 - Existing result list is not hidden (0.125 points)
 - Spinner of the search button is shown in the correct place until a response arrives and is hidden afterwards (0.125 points)
 - The result list is replaced with the new results once the response arrives (0.25 points)

Responsive Design (2 points)

- The design of the website is as shown in the reference video and the screenshots in mobile view for iPhone 14 Pro Max. (1 point)
- All functionalities of the web page work in the mobile view correctly for iPhone 14 Pro Max. (1 point)

Point Reductions

- Not using GCP App Engine (or appspot.com subdomain) for both frontend and backend parts (-3 points)
- Frontend directly connects to Artsy instead of backend (-4 points)
- Bootstrap is not used (-4 points)
- Frontend is not implemented in Angular (-4 points)
- Backend is not implemented in Node.js (-4 points)
